^{a)} Inhalants: "...(glue etc) in order to get high".

FAROE ISLANDS

Data on the 12-months prevalence of alcohol consumption and on estimated volumes consumed on the latest drinking day are missing from the Faroese study. The proportion of students who reported drunkenness during the past 12 months (41%) is very close to the ESPAD average. The only variable among those presented here for which the proportion is higher than the average is the 30-days prevalence of smoking cigarettes (33%). Very few of the Faroese students report any use of cannabis (6%), which is about one-third of the ESPAD average, and the use of drugs other than cannabis is almost non-existent (1%). Other behaviours, such as use of inhalants (8%), non-prescription use of tranquillisers or sedatives (3%) and use of alcohol in combination with pills (6%), are all at a rather low level which is close to the average.

C24 How difficult do you think it would be for you to get marijuana or hashish (cannabis) if you wanted?

Impossible: 24%

Very difficult: 24 %

Fairly difficult: 18 %

Fairly easy: 14 %

Very easy: 2 %

Don't know: 17 %

On how many occasions (if any) have you used marijuana or hashish (cannabis)? (% of all students)

Mark one box for each line.

	Number of occasions						
	0	1-2	3-5	6-9	10-19	20-39	40 or more
a) In your lifetime.....	94	3	1.3	0,3	<input type="checkbox"/>	<input type="checkbox"/>	0.5
c) During the last 30 days.....	94	0,5	0.3	<input type="checkbox"/>	<input type="checkbox"/>	0.3	0.3
	1	2	3	4	5	6	7

On how many occasions (if any) have you used ecstasy in your lifetime?

- 580: never
- 6: 1-2 times
- 8: missing

Number of students participating: 594

On how many occasions (if any) have you used inhalants in your lifetime

- Never: 553
- 1-2 times: 22
- 3-5 times: 5
- 6-9 times: 3
- 10-19 times: 1
- 20-39 times: 2
- > 39 times: 3
- Missing: 30

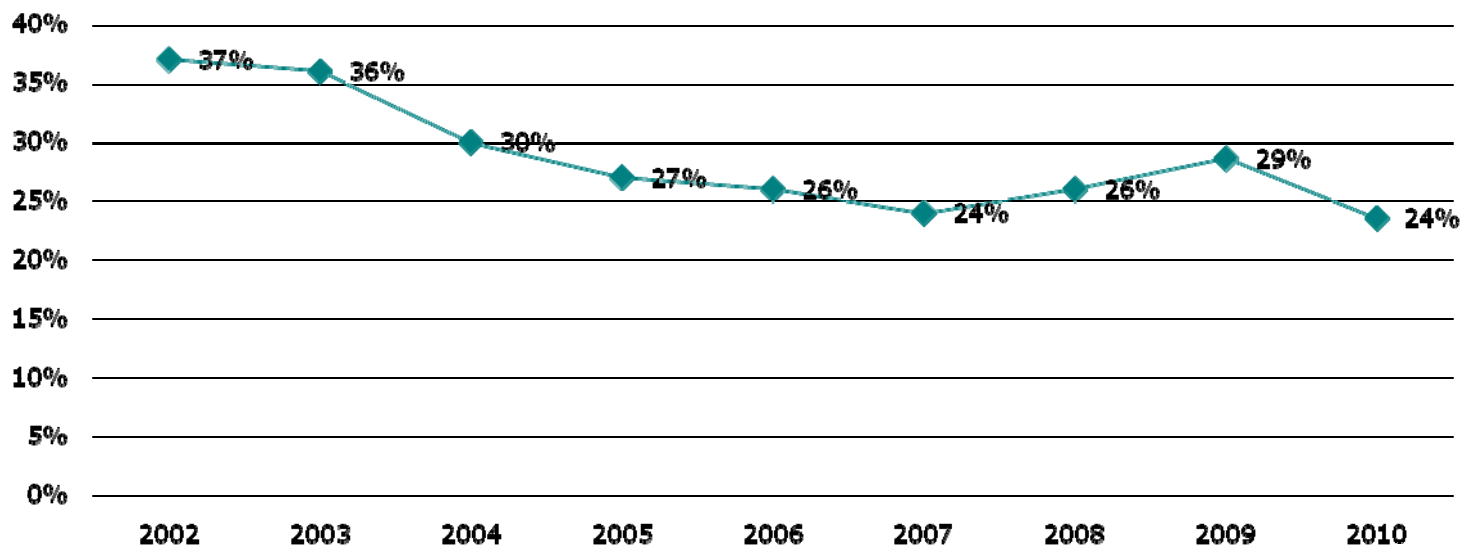

On how many occasions in your lifetime (if any) have you used any of the following drugs?

Mark one box for each line.

Never in % of all respondents

a) Tranquillisers or sedatives (without a doctor's prescription)	97,8
b) Amphetamines	99,2
c) LSD or some other hallucinogens	99,7
d) Crack	99,5
e) Cocaine.....	98,8
f) Relewin	100
g) Heroin	99,3
h) "Magic mushrooms"	98,3
i) GHB	99,3
j) Anabolic steroids.....	100
k) Drugs by injection with a needle (like heroin, cocaine, amphetamine)	97,4
